# Flatpanel

## What is a Flatpanel ?

Flat Panel is a 'smart' product offering the constructor unlimited capabilities.

It is very cheap and at the same time very easy to use.

Its manufacture is a result of TEHNI's S.A. long experience in Panel Industry

It consists of 2 Aluminium or PVC Flat Sheets that coats the insulating material. Sheets are placed together with a special adhesive.

Flat Panels are offered in many different dimensions and also in a wide range of colours.

## Advantages - Where to use

Flat Panel offers to the constructor a wide range of competitive advantages against other methods used for the cover of surfaces.

Ease of use, since Flat Panels are offered in many different dimensions. Cutting as well as product installation is completed in very few minutes.

High thermal and sound insulation performance because of the polyurethane that contains

Money can be saved because of price competitiveness compared to all other materials used for surface covering.
